**1. TCS is shifting toward an 'AI-First' approach, integrating Generative AI across its offerings and developing intelligent agent solutions.**

Source: tcs\_fy25.pdf • Page 10

### Evidence

TCS is proactively leading this change. We have systematically infused AI across our offerings and built

intelligent agent solutions throughout the value chain.

## **2. The company is transitioning to 'Service-as-a-Software' models and exploring new segments including Digital Public Goods, Autonomous Vehicles, and Space Tech.**

Source: tcs\_fy25.pdf • Page 82

### **Evidence**

Invest in AI/GenAI by establishing Centres of Excellence, developing industry-specific solutions, and pioneering Service-as-a-Software offerings. Venture into and explore new segments and products such as Digital Public Goods, Autonomous Vehicles, Mobility as a Service, Health and Wellness.

## **3. TCS is shifting toward outcome and value-based engagement models to create greater business impact.**

Source: tcs\_fy25.pdf • Page 84

### **Evidence**

Transition to outcome and value-based engagement models, offering quantified value delivery and risk-adjusted commercial structures to create greater business impact.
